PORTFOLIO

<https://ssannejohansson.github.io/portfolio2026/>

I'm a **certified** Full Stack Web Application Developer currently studying **Back End Development**. I'm educated both to write **clean, responsive code** from scratch and to use **frameworks** and libraries as Bootstrap, jQuery, React and Tailwind.

Prior to my Web Development Studies I've graduated in **Aesthetics-Media**, which included studies in **digital creativity**, photography, film and media production and aesthetic communication.

My passion lays in making a visually appealing and **user friendly** user experience and to create this down to the smallest of **details**.
